BERRIES

The Good Earth

STRAWBERRIES

Don't They Make Your Mouth Water? LITTLE SPACE! EASY TO GROW!

DELICIOUS FRUITS!

BLAKEMORE. Bright red berries which do not lose their color. Firm and delicious, early

KLONDIKE. Will do well on wide variety of soils, and stands the heat of interior, warm sections. Good color, sweet and firm.

MISSIONARY (Carolina). Noted for its adaptability to sandy, poorer soils. Seems to like the hotter weather, and matures following the

PROGRESSIVE EVERBEARING. A fine companion for Gem. Excellent fruit, also bears over long season. Plants of each variety will keep luscious berries available for many months.

72c a dozen, 20 for \$1.00, 75 for \$3.00 TAX AND POSTAGE PAID

BOYSENBERRIES

Large, black, luscious berries known the world over. A "must" for every garden.

THORNLESS BOYSENBERRY. No thorns to worry

YOUNGBERRIES

Bears several weeks ahead of Boysenberry, heavy crops of highly-flavored fruit. Seeds few and soft.

THORNLESS YOUNGBERRY.

LOGANBERRIES

An old favorite for jams, jellies and juice. Dark red fruit of excellent flavor.

Regular and Thornless (Plant Pat. 82) varieties. All above Berries at following low prices:

Regular-25c each plant, 10 for \$2.00.

Thornless-35c each plant, 3 for \$1.00, 10 for \$3.00.

Tax and Postage Paid

RASPBERRIES

With a little more water than other berries, Raspberries will do well in your garden. These tested varieties give you the best available, including the newer blacks and the famous purples. Plant several kinds and enjoy the real raspberry flavor.

CUMBERLAND. Large, heavy-bearing purplish-black berry of fine quality.

CUTHBERT. One of the finest red raspberries, well suited for Southern California. Sweet and aromatic.

MORRISON. Another fine black. Long canes, producing bountiful fruit.

MUNGER. The Southland's large and sweet "black-cap". You should have this one.
Prices (except Sodus Purple): Each 25c,

2 of each variety \$2.00

SODUS PURPLE. Heavy bearers of fine fruit, combining the qualities of red and black raspberries. Largest variety grown, juicy, sweet and delicious. Often produce in the fall from early

Each plant, 29c, 4 for \$1.00

DEWBERRY

Earliest to ripen of any berry. Large, black berries of fine flavor, borne in great abundance. Include these in your berry planting on fence,

Each plant 25c

BLACKBERRIES

Fine for jelly or eating fresh—real "honest-to-goodness" old-fashioned flavor.

CAMERON. Long, strong-growing canes of jet-black fruit. Abundantly bearing fine quality for many purposes.

CRANDALL. Heavy enough grower that it needs no trellising. Bears the earliest of all, in June and July, enormous crops.

CORY'S. Almost thornless, a boon to berry growers. Sweet and small-seeded.

Each plant 25c, 5 plants, your choice, \$1.00

ASPARAGUS

Paradise or Mary Washington varieties, both fine and early-season bearing. Crisp and tender stalks, tender tips. 12 plants for 75c, 20 for \$1.00.

PERENNIAL VEGETABLES

A few small spots around your yard and garden are all you need for a goodly supply of these fine vegetables which increase from year to year. And they add color, too. Your small investment now will pay big dividends in a short time, and then from your own garden you can harvest your fresh produce.

RHUBARB

The favorite Strawberry variety. Three plants will supply an ordinary family. Allow one year before cutting stalks. **Each 25c.**

Famous French Green Globe variety, with buds of fine flavor. Easy to grow, and when cut back each fall, the plants again produce fine buds the following year. Excellent as an ornamental. Each plant 35c, 3 for \$1.00. Page 2

HORSERADISH A few plants will give you sauce and pickles from your own back yard. Use plenty of water for best results. Roots: 18c each, 6 for \$1.00.

GRAPES

For a Fine Source of Food in a Limited Space

> 3 Fine Grapes for this area

Eastern Concord, Thompson Seedless Muscat

All 3 for 79°

Many Others in Stock

Be Sure to Dust Your Grapes in the Spring With Sulphur

SOIL PREPARATION

Prepare your soil by a thorough irrigation, and addition of 1 sack of steer manure to each 250 sq. ft. of ground, well spaded in. Take level, and plant your seeds or plants in rows for ease of cultivation. Space your rows to allow for type of tools you use. Usually furrow irigation is used.

Commercial fertilizer used as a side dressing, after the plants are well advanced, aids in rapidly developing vegetables high in health giving quality.

By planned planting we can have a year round garden. Root crops, leafy vegetables, peas, and onions in fall, winter, and early spring. Beans, corn, peppers, tomatoes, squash, and many others in summer.

We are at all times prepared to properly advise and assist you.

BERRIES, SMALL FRUITS

A section of your yard can be advantageously used for berries, small fruits, rhubarb, asparagus, and artichokes, supplementing your diet with delicious garden fresh dishes. Too, you can quick freeze, can, and preserve for future use.

Varieties especially adapted for this section and developed for the home gardener are carried by us.

FERTILIZERS, SPRAYS, GARDEN TOOLS

Our garden supply store carries a complete line of fertilizers, spray material, sprayers, and garden tools to aid in proper maintenance of your garden.

How to Plant A Fruit Tree

Dig the hole large enough to accommodate the roots without crowding. Cultivate one pound of bone meal into the bottom of the hole. Set the tree so that the graft is at least an inch above the level of the soil. Remove all broken roots. Then fill in with peat moss and top soil around them. When the hole is half filled with soil, pour in a bucket of water which will help to firm the soil around the roots, and provide moisture. After the water has penetrated, the hole can be filled level with the ground. Tramp the new soil firmly, and water again.

When planting fruit trees provide for a depression around the tree to catch water. Water once per week until the tree is in full leaf. Then water twice per month. In the summer you can mulch the tree with well decomposed manure.

Be sure your fruit trees are trimmed during the winter months, and sprayed with Lime Sulphur or Bordo Mixture.

highly acid, making it a good cooking apple. oes well along the coast. Ripens in Septem-

Crab Apples Transcendent-Medium-sized, yellow-striped with red cheeks, excellent for jelly and preserves. Ripens in August. Heavy producer.

Red Siberian-Small, red crab apple. Heavy producer. Ripens in September.

Almonds

Drake—Medium-sized, round soft shelled almond.
Good pollinator for Nonpariel.

1. X. L.—Large, soft shelled almond. Good producer.
Mission—Small, soft shelled almond. Good producer. Good pollinator for other varieties.
Nonpariel — Medium-sized, paper skin shelled almond. California's best commercial almond.
Ne Plus — Large, oblong, soft shell almond. Fair producer. Good pollinator for Nonpariel.

Page 3

How to Plant Roses

Roses will grow in almost any kind of soil and in most locations if properly pruned and ready to plant.

We recommend planting about 3 to 4 feet apart in order to have plenty of room to work around the bush.

Dig a hole deep and broad enough so the roots will spread naturally without crowding. Mix the soil that is removed from the hole with one pound bone meal for each bush, and after placing the bush in the hole, fill in with the mixed soil.

Always remember to keep the bud at the ground level. A good mulch of steer manure or peat moss is used for a permanent top dressing. This keeps the ground cool as well as controls the weed problem.

Roses like plenty of water but should never be allowed to have damp feet.

PATENTED ROSES

(Not Included in Special Offers)

RED

Charlotte Armstrong (Pat. 445).

One of the finest ever. Bloodred in bud, opening to cerise in
hot weather and to spectrumred when cool. \$1.50.

Mirandy (Pat. 632). All-American award winner for 1945. Fragrant, rich, dark red. Stout stems, heavy foliage. \$1.50.

San Fernando (Pat. applied for). 1948 All-American winner. Glowing currant red buds, opening to brilliant scarlet. \$2.00.

Nocturne (Pat. 713). Deep cardinal red buds of exquisite shape, open to form large, richly textured fragrant flowers. \$2.00.

Heart's Desire (Pat. 501). Long stemmed buds open to pure, luminous red. The color is sunproof. Vigorous grower, free blooming. \$1.50.

Grand Duchess Charlotte (Pat. Pend.). Unusual in color—a new red. Rich claret shade in bud, opening to lovely begonia rose. \$1.50.

Will Rogers (Pat. 256). Cupshaped black velvety crimson maroon flowers make this variety very showy. \$1.25.

Floradora (Pat. Pend.). Dense clusters of good size bright red flowers. A popular Floribunda rose. \$1.25.

PINK

Tallyho (Pat. applied for). 1949 award winner. A lovely combination of pink and red. The outside of petals is crimson to cardinal depending on the weather, while the inner surfaces are many shades of rose and pink. Robust and free branching. \$2.50.

Show Girl (Pat. 646). Perfect phlox pink buds on long stems for cutting. Lovely in form and color, and very fragrant. \$1.50.

Santa Anita (Pat. 539). One of the finest pink roses for Southern California. Rich, clear color with shapely buds. \$1.25.

Good News (Pat. 426). The heart of the bloom as it opens is peach-pink, and later silverypink. Produces quantities of fullpetaled blooms. \$1.50.

Pinkie (Pat. 712). Dainty, perfectly formed pink buds and spicily scented flowers. Continuous bloomer. One of the best small bushes. \$1.50.

Sweet Sixteen (Pat. 631). Long slender buds in delicate shades of light pink with tints of rose, and a dash of gold at the base of each petal. Tall and sturdy plant, with flowers on long stems. \$1.50.

YELLOW

Peace (Pat. 591). All-American winner in 1946. Receives acclaim everywhere. Large, full double flowers opening from well-shaped buds. Often a clear pleasing yellow, sometimes only at the base, fading to a lighter tint and a delicate pink where the petals turn over. \$2.00.

Debonair (Pat. 677). A fine yellow rose, producing quantities of buds and blooms. Vigorous growers with dark green foliage. \$1.50.

Lowell Thomas (Pat. 595). A perfection rose. Long slender buds open to lemon-chrome with a high-cupped center. \$1.50.

Mme. Chiang Kai-Shek (Pat. 664).
Another All-American winner.
Lemon yellow, fading to light
yellow as the flower matures.
Good grower with leathery
foliage. \$1.50.

MULTI-COLOR

Forty-niner (Pat. 792). A brilliant-hued flower, outstanding with its vivid red petals, bright yellow to straw yellow on the outside. Mild, pleasing fragrance. Top award winner for 1949. \$2.50.

Mark Sullivan (Pat. 599). Large blooms of golden yellow, heavily veined and shaded deep rosepink and cerise. \$1.25.

Fiesta (Pat. 389). A real striped rose of vermilion and yellow. Unusual in colorings. Nice foliage. \$1.50.

SALMON-COPPER

California (Pat. 449). Glorious shade of ruddy orange, toned with saffron yellow, with the exterior of the broad petals overlaid with Saturn rose. Flowers of enormous size. \$1.25.

Mme. Henri Guillot (Pat. 337.)
Reddish orange with undertone of gold, opening to rich, deep pink flowers of camellia-like form. Striking foliage, good grower. \$1.50.

Apricot Queen (Pat. 464). A lovely combination of orange and apricot at the base of the petals, merging to salmon-rose. \$1.25.

CLIMBING ROSES

Patented Varieties

Climbing Ville de Paris—Large sun yellow blooms, slightly tinged with orange.

CLIMBING-WHITE

Climbing Mme. Jules Bouche—A beautiful white, with a touch of pink in the bud. Very hardy.

Page 5

CAMELLIAS

Ornamental evergreen shrubs of exquisite beauty and highly prized for their flowers during the winter months. After blossoming the dark green glossy foliage and dense habit of growth make an attractive appearance in the garden.

Camellias are easy to grow in a shady, sheltered location, an acid soil with good drainage in which generous quantities of leaf mold or peat have been added. They require generous amounts of water during the growing season but this should never become stagnant for lack of drainage. Withhold fertilizer after the flower buds have set. All are hardy in Southern California.

FRAGRANT DAPHNE

Daphne odora marginata. Dense low shrub with rich green, cream-margined leaves and clusters of exquisitely fragrant waxy white or pink flowers from January to March. Good drainage is necessary. Shade or partial shade. Very hardy. Gal. \$1.50, 5-gal. \$4.95. Page 6

AZALEAS

For sheer beauty the masses of flowers produced by Kurume Azaleas in late winter and spring with the end of the Camellia season, have no equal. They are essentially lovers of an acid soil which should possess an excellent drainage. Pure peat would be best. Keep lime in any form away from them, even acid fertilizers should be used that are especially prepared for Azaleas. Light shade and plenty of water at all times. Kurume Azaleas. We will have a good selection.

INDICA AZALEAS

These are by far the choicest of the Azalea family with closely formed bushy growth, neat dark green leave! A gorgeous display of large flowers, mostly double but of delicate pleasing quality, often blended with other colors and plain or ruffed.

Albert Elizabeth—Double, white with pale pink margins.

Eric Schame—Large double flowers, salmon-pink with white blotches and streaks.

Fred Sanders — Masses of brilliant red flowers in spring. Low growing.

Jane Peters—A large single red flower. Very low.

Orchid Flora — Spectacular, large double flowers of brilliant orchid-pink.

Paul Schame—Double, Lustrous coral sal-

mon. Most popular.

Pink Pearl — One of the most popular.

Large delicate pink flowers, daintily doubled and spotted.

Temperance—Also called "Easter Azalea," this variety produces a profusion of large double lavender flowers that cover the entire bush.

Professor Walters-Single ruffled. White with deep blotches on upper petals.

Vervaeneana—Double. Salmon-rose color on white background. Or the same in white.

Wm. Van Orange — Big, single orange blooms. Early, free-flowering.

Chasta Diana—White,

Sakura Gari-Lavender Pink.

Rhodedendron-Lavender.

Houri-Light Purple.

Fiesta—Deep Salmon.

Singing Sun-Orange.

Rosey Cheeks-Pink.
Lorraine-Pink.
